

SPEED LIMITER

The speed limiter is a screw installed in the throttle control case. It limits maximum throttle and top speed to about 25 Km/h. (16 mph). This limiter is especially applicable to beginning riders. It can be removed after the rider is proficient only if the screw hole is plugged with the plug furnished with the ATC70.

WARNING

Failure to plug the hole after removing the speed limiter screw will allow dirt to enter, and may cause the throttle to stick open.

CAUTION

To prevent rapid centrifugal clutch wear, do not operate below 17 km (9 mph) in third gear.
