

## ATC SAFETY

---

### MESSAGE TO PARENTS

The ATC 70 is designed for junior riders (rider weight of 150 pounds or less). It is a fine learning ATC as long as the following precautions are observed:

- \* The parent or instructor must be fully familiar with the ATC 70 and the ATC's controls before starting to teach a junior rider. Both instructor and student must fully understand everything in this manual before riding instruction begins.
- \* The ATC 70 is an OPERATOR-ONLY model. The rider weight limit of 150 pounds must be observed.
- \* The practice location must be a level, uncongested off-road area free of obstacles.
- \* It is illegal to ride the ATC 70 on

public streets, roads or highways. It must be ridden only in off-road areas where such activities are permitted. If it becomes necessary to cross a public roadway, remember to get off the ATC and push it across.

- \* For safety, the ATC 70 must be properly adjusted and maintained. Be sure to make a "Pre-ride Inspection" and be sure to impress the student rider with the importance of checking all the items thoroughly before riding the ATC.
