

Engine Oil

(Refer to the maintenance precautions on page 48).

Engine Oil

Good engine oil has many desirable qualities. Use only high detergent, quality motor oil certified on the container to meet or exceed requirements for API Service Classification SF. It is not necessary to use additives.

Viscosity:

Viscosity grade of engine oil should be based on average atmospheric temperature in your riding area. The following provides a guide to the selection of the proper grade or viscosity of oil to be used at various atmospheric temperatures.

ATTENTION

Do not use oils with graphite or molybdenum additives: they will adversely affect clutch operation.

**MOBIL SUPER MOTO 4T
API Service Classification SF
Viscosity: SAE 20W-50**
