

## Preparation

Before starting, insert the key, turn the ignition switch ON and confirm the following:

- The transmission is in neutral (neutral indicator is ON).
- The engine stop switch is at  (RUN).
- The ABS indicator is ON. (CBR250RA).
- The PGM-FI malfunction indicator lamp (MIL) is OFF.

### < CBR250RA >

The ABS indicator should go off after you ride the motorcycle at a speed above 10 km/h (6 mph).

## Starting Procedure

This motorcycle has a fuel-injected engine with an automatic choke. Follow the procedure indicated below.

### Any Air Temperature:

- With the throttle completely closed, press the start button.

The engine will not start if the throttle is fully open (because the electronic control module cuts off the fuel supply).
