

**CAUTION:**

- \* When checking the battery electrolyte level or adding distilled water, make sure the breather tube is connected to the battery breather outlet.
- \* Use only distilled water in the battery. Tap water will shorten the service life of the battery.
- \* Filling the battery above the UPPER LEVEL line may cause the electrolyte to overflow, resulting in corrosion to engine or frame parts. Immediately wash off any spilled electrolyte.
- \* The battery breather tube must be routed as shown on the label. Do not bend or twist the breather tube. A bent or kinked breather tube may pressurize the battery and damage its case.
