Valve Clearance

3. Measure the exhaust valve clearance by inserting a feeler gauge (1) between the exhaust rocker arms (3) and shims (4).

- (1) feeler gauge
- (3) exhaust rocker arms
- (4) exhaust valve shims

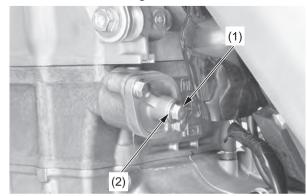

Valve Clearance:

IN: 0.16 ± 0.03 mm $(0.006 \pm 0.001$ in) EX: 0.28 ± 0.03 mm $(0.011 \pm 0.001$ in)

If intake valve clearance and exhaust valve clearance need adjustment, see Camshaft Removal (this page) and select the correct shim for each valve.

Camshaft Removal

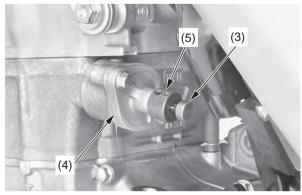

- 1. Record the intake valve and exhaust valve clearances (page 73). Make sure the piston is at TDC on the compression stroke (page 72).
- Remove the cam chain tensioner lifter cover bolt (1) and sealing washer (2).

(1) cam chain tensioner lifter cover bolt (2) sealing washer

- 3. Insert the tensioner stopper (3) into the cam chain tensioner lifter (4). Turn the tensioner stopper clockwise and lock the cam chain tensioner lifter by pushing the
- Tensioner stopper
