

Audio System (Continued)

To play a track on a USB digital audio player

- 1 Make sure that your digital audio player is on and connected to the audio system.
 - ▶ The USB device status icon is displayed when a digital audio player is connected.

- 2 Select the audio mode 3 or 4 using the **MODE** button. **➡ P.50**

A track will be played and the playing status icon will be displayed when the information of the digital audio player is received.

- ▶ If it takes a long time before a track starts playing, check the status of the digital audio player.

To pair a *Bluetooth*® sound device

➡ P.52

To stop the track

Press the **AUDIO** power button. The audio system turns off and the track stops.

To change a track on the USB audio device

Press the **TRACK** \triangle (up) button to skip to the next track.

Press the **TRACK** ∇ (down) button to go back to the beginning of the current or previous track.

Album selection, play mode (Repeat, shuffle, etc.) change and other operations cannot be performed on the audio system. Set up those functions in each audio device to connect in advance.
