

Symptom	Cause/remedy
<p>Unable to connect <i>Bluetooth</i>® device</p>	<p>Some <i>Bluetooth</i>® devices and applications software you use may not be connected automatically. For connecting, follow the instructions in the instruction manual of your <i>Bluetooth</i>® device.</p>
	<p>The <i>Bluetooth</i>® devices that can be connected at the same time are limited to one audio device and one sound device. If another device is paired, the pairing information will be overwritten. When re-pairing a previously paired <i>Bluetooth</i>® device, reset the pairing information before performing the procedure. ➤ P. 54</p>
	<p>When your <i>Bluetooth</i>® device is registered with another <i>Bluetooth</i>® device, your device may be connected to the device but not to the audio system. For connecting properly, follow the instructions in the instruction manual of your <i>Bluetooth</i>® device.</p>
	<p>If the problem continues after the above-described inspection, perform re-pairing after resetting the pairing information. ➤ P. 51, 54</p>
