

Driving Guidelines

Driving with Cargo or Pulling a Trailer

The added weight of carrying cargo or pulling a trailer will affect how your vehicle accelerates, brakes, and handles. The added weight and length of a trailer will affect your directional control.

Please follow these guidelines whenever you carry cargo or pull a trailer:

- Do not exceed the cargo limit and towing limits (see page 47 for loading cargo and page 49 for towing a trailer).
- Keep speed low, particularly when driving on hills.
- Allow extra distance to accelerate and slow or stop.
- Do not drive across a steep slope with a trailer.

Basic Driving

Making Turns

The basic turning technique for Honda MUV is to drive at low speed and gradually adjust the amount of steering to suit the surface. Do not make sudden sharp turns, either off-road or on pavement.

If your vehicle ever skids sideways during a turn, steer in the direction of the skid. Also, avoid hard braking or accelerating until you have regained directional control.

Braking

The best off-road braking technique is to gently step down on the brake pedal, then increase pressure as more braking is needed. Light braking may be all you need on soft surfaces, such as sand or loose dirt. Avoid hard braking on any surface.
