

5. Be sure to keep the throttle closed and the rear brake (1) locked while the engine is warming up.
6. Allow the engine to warm up before riding.
(See "RIDING" page 57).

(1) Rear brake lever

⚠ WARNING

- Do not open and close the throttle rapidly as the scooter will lurch forward suddenly, causing possible loss of control.
- Do not leave the scooter unattended while the engine is warming up.
