

▲ WARNING

- * **Do not downshift when traveling at a speed that would force the engine to overrev in the next lower gear; the rear wheel may lose traction, resulting in a possible loss of vehicle control.**

CAUTION:

- * **Do not shift gears without closing the throttle. The engine and drive train could be damaged by overspeed and shock.**
- * **Do not tow the motorcycle or coast for long distances while the engine is off. The transmission will not be properly lubricated and damage may result.**

High Altitude Riding

When operating this motorcycle at high altitude the air-fuel mixture becomes overly rich. Above 2,000 m (6,500 feet) driveability and performance may be reduced and fuel consumption increased. See your authorized Honda dealer for high altitude adjustment.
