

Check the tyres for cuts, imbedded nails or other sharp objects. Check the rims for dents or deformation. If there is any damage, see your authorized Honda dealer for repair, replacement, and balancing.

⚠ WARNING

- * **Improper tyre inflation will cause abnormal tread wear and create a safety hazard. Underinflation may result in the tyre slipping on, or coming off of the rim causing tyre deflation may result in a loss of vehicle control.**
- * **Operation with excessively worn tyres is hazardous and will adversely affect traction and handling.**

Replace tyre before tread depth at the center of the tyre reaches the following limit:

Minimum tread depth	
Front:	1.5 mm (1/16 in)
Rear:	2.0 mm (3/32 in)

Repair

Puncture of tubeless tyres may be fixed externally for emergency. See your authorized Honda Dealer for the correct method before you encounter actual failure on the road.

⚠ WARNING

- * **Do not run at speed above 60 km/h (40 mph) after making an external repair. It must be followed by an internal repair at the nearest Honda Dealer as soon as possible.**
