

MAJOR COMPONENTS

(Information you need to operate this motorcycle)

TUBELESS TYRES

This motorcycle is equipped with tubeless tyres, valves, and wheel rims. Use only tyres marked "TUBELESS" and tubeless valves on rims marked "TUBELESS TYRE APPLICABLE."

Never mount tyres designed for use on automobiles on a motorcycle rim.

WARNING

- ***Any attempt to mount passenger car tyres on a motorcycle rim may cause the tyre bead to separate from the rim with enough explosive force to cause serious injury or death.***

Proper air pressure will provide maximum stability, riding comfort and tyre life. Check tyre pressure frequently and adjust if necessary.

NOTE:

- Tyre pressure should be checked before you ride while the tyres are "cold."
- Tubeless tyres have some degree of self-sealing ability if they are punctured, and leakage is often very slow. Inspect very closely for punctures, especially if the tyre is not fully inflated.
