

FEATURES (Not required for operation)

To remove the saddlebags:

Insert the ignition key and turn it counterclockwise to open the latch lever. Remove the saddlebag by sliding it backward ①, lifting up ② and pulling it out toward you ③ as shown.

NOTE:

- After removing, lock the latch lever with ignition key.
- Do not remove the protective tapes from the rear cowl and saddlebags when removing the saddlebags.

To install the saddlebags:

- Reverse the removal procedure.
- Make sure the hooks are aligned before pushing the saddlebag forward.
- After installing the saddlebags, check that the hooks engage securely.
- Close the latch lever and turn the ignition key clockwise.

NOTE:

- Make sure the latch levers are locked before riding.
