
Load Limits

Following are the load limits for your motorcycle:

Maximum weight capacity: = 196 kg (432 lbs)

Includes the weight of the rider,
passenger, all cargo and all accessories

Putting too much weight in individual storage compartments can also affect stability and handling. So be sure to stay within the limits given below:

Maximum cargo weight: = 31 kg (68 lbs)

includes following maximum
compartment weights:

rear carrier = 9.0 kg (20.0 lbs)

each saddlebag = 9.0 kg (20.0 lbs)

each fairing pocket = 2.0 kg (4.5 lbs)

The weight of added accessories will reduce the maximum cargo weight you can carry.

Loading Guidelines

Improperly loading your motorcycle can affect its stability and handling. Even if your motorcycle is properly loaded, you should ride at reduced speeds and never exceed 130 km/h (80 mph) when carrying cargo.

Follow these guidelines whenever you carry a passenger or cargo:

- Check that both tyres are properly inflated (page 41).
- If you change your normal load, you may need to adjust your rear suspension settings (page 28) and your headlight (page 65).
- To prevent loose items from creating a hazard, make sure that storage lids are properly closed and that any other cargo is securely tied down before you ride away.
