

TIRE RECOMMENDATION

Correct inflation pressure will provide maximum stability, riding comfort and tire life.

Be sure to follow the tire specifications.

Cold tire pressures psi (kg/cm ²)	Up to 165lb(75kg) load	Front: 14(1.0)
		Rear : 17(1.2)
	Up to vehicle capacity load	Front: 17(1.2)
		Rear : 28(2.0)
Vehicle capacity load	300 lbs (135kg)	
Tire size	Front : 3.50-10	
	Rear : 3.50-10	

NOTE : Over or under inflation of the tires causes abnormal tread wear or other defects which may result in serious accidents. Riding with under-inflated tires will cause the tires to slip out of place in the rims, damaging the innertube valves.

From time to time check the tires for inflation pressure and correct it, if necessary.
