

6. Wash the filter in nonflammable or high flash point solvent and allow it to dry thoroughly.

▲ WARNING

POTENTIAL HAZARD

Using gasoline or low flash point solvents for cleaning ATV parts.

WHAT CAN HAPPEN

A fire or explosion could result.

HOW TO AVOID THE HAZARD

Use only a nonflammable or high flash point solvent for cleaning ATV parts.

7. Soak the filter in clean gear oil (SAE 80—SAE 90) until saturated, then squeeze out the excess oil.

CAUTION:

Do not twist the filter element when squeezing out excess oil. Twisting could damage the filter.

8. Reassemble by reversing the disassembly sequence.
