

STORING YOUR FOURTRAX

STORAGE

Before storing your FOURTRAX for an extended time, be sure you thoroughly check the vehicle for needed repairs and have them corrected. Otherwise, the repairs may be forgotten by the time you remove the vehicle from storage.

In addition, extended storage requires that you take the following steps to reduce the effects of deterioration from non-use of the vehicle:

1. Change the engine oil and oil filter.
2. Make sure the cooling system is filled with 50/50% antifreeze solution (page 129).
3. Drain the fuel tank and carburetor. Be sure to drain the fuel in a well-ventilated area, not in a garage.
