

# Spark Plug

---

## Spark Plug Recommendation

standard spark plug	IJR7A9 (NGK) or VX22BC (DENSO)
for cold climate (below 5°C, 41°F)	IJR6A9 (NGK) or VX20BC (DENSO)

Use only the recommended type of spark plug in the recommended heat range.

### NOTICE

*Using spark plugs with an improper heat range can cause engine damage.*

This ATV uses spark plugs that have an iridium coated centre electrode. Be sure to observe the following when servicing the spark plugs.

- Do not clean the spark plugs. If an electrode is contaminated with accumulated objects or dirt, replace the spark plug with a new one.
- Use only a “wire-type feeler gauge” to check the spark plug gap if necessary. To prevent damaging the iridium coating of the centre electrode, never use a “leaf-type feeler gauge.”
