

## If You Have a Flat Tyre

---

If the leak is more serious, or a temporary repair doesn't hold, the tyre must be replaced. The tyre will also need to be replaced if it is damaged (page 157). Replacing a tyre involves removing and re-installing the wheel (page 191).

If you are unable to repair a flat tyre on the trail, you will need to send for help. We strongly recommend that you do not try to ride with a flat tyre. The ATV will be hard to handle, and if the tyre comes off the rim, it may lock up the wheel and cause you to crash.
