

## Rear Brake Fluid Level:

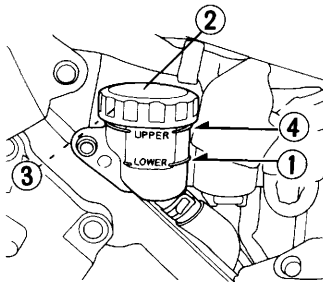

### **▲ WARNING**

- \* **Brake fluid may cause irritation. Avoid contact with skin or eyes. In case of contact, flush thoroughly with water and call a doctor if your eyes were exposed.**

Remove the right side cover (page 39).

Check the brake fluid with the motorcycle in an upright position.

Brake fluid must be added to the reservoir whenever the fluid level begins to reach the LOWER level mark (1). Remove the reservoir cap (2), and remove the diaphragm (3). Fill the reservoir with DOT 4 BRAKE FLUID from a sealed container up to the UPPER level mark (4).

- (1) LOWER level mark
- (2) Reservoir cap
- (3) Diaphragm
- (4) UPPER level mark
