

**⚠ WARNING**

- Do not attempt to patch a damaged tyre or inner tube. Wheel balance and tyre reliability may be impaired.
- Improper tyre inflation will cause abnormal tread wear and create a safety hazard. Underinflation may result in the tyre slipping on, or coming off of the rim causing tyre deflation that may result in a loss of vehicle control.
- Operation with excessively worn tyres is hazardous and will adversely affect traction and handling.
- The use of tyres other than those listed on the tyre information label may adversely affect handling.

Replace tyres before tread depth at the center of the tyre reaches the following limit:

Minimum tread depth	
Front :	1.5 mm (0.06 in)
Rear :	2.0 mm (0.08 in)

**NOTE:** < For Germany >

- German law prohibits use of tyres whose tread depth is less than 1.6 mm.
