

## Battery

The VTR250 is equipped with a maintenance free battery. Battery fluid level check or refill are not required. Keep the battery terminals free of dirt and corrosion.

## Battery Handling

Keep the battery away from fire or sparks. Battery fluid is diluted sulphuric acid. Do not allow contact with skin or eyes.

## Advice

- Do not remove the fluid filler cap. The battery is fully sealed.
- No need to remove the cap even when charging.
- "Jump starting" a flat battery may cause damage to the battery plates or cells. Charge the battery rather than use "Jumper Leads".

## Caution

The diluted sulphuric acid electrolyte is highly corrosive and can cause severe burns if it comes in contact with the eyes or skin.

- Wear protective goggles and clothing when working near the battery.
- Keep the battery out of reach of children.

## Emergency Treatment

- If the electrolyte gets in the eyes:
  - Flush with water from a glass for at least 15 minutes. Avoid pressurized water as it may harm the eyes.
- If the electrolyte contacts the skin:
  - Remove the clothes and wash the skin with plenty of water.
- If the electrolyte is swallowed:
  - Drink water or milk  $\bar{n}$  do not induce vomiting.

In any case, consult a doctor immediately.
