

## **Trouble shooting (If the engine fails to start)**

---

Check the following points if the engine stops or fails to start.

- Have you started the engine according to the operator's manual?
- Is there gasoline in the fuel tank?

### **Breakdown repairs**

- Request the closest HONDA dealer for repairs.
- Avoid attempting to hastily repair the motorcycle on your own.

Requesting a HONDA dealer for inspection/maintenance at your earliest convenience is the best way to prolonging the useful life of your motorcycle.
