

## Battery Goes Dead

### CBR1000RR/RA

Charge the battery using a motorcycle battery charger.

Remove the battery from the motorcycle before charging.

Do not use an automobile-type battery charger, as these can overheat a motorcycle battery and cause permanent damage. If the battery does not recover after recharging, contact your dealer.

### NOTICE

Jump starting using an automobile battery can damage your motorcycle's electrical system and is not recommended.

Bump starting is also not recommended.

### CBR1000S1/S2

Battery charging is needed.

A battery charger recommended by your lithium-ion (li-ion) battery manufacturer is needed for battery charging.

Contact your dealer before charging the battery.

Remove the battery from the motorcycle before charging.

### NOTICE

Only use a charger recommended by your lithium-ion (li-ion) battery manufacturer. Using a battery charger that is not recommended can cause permanent damage to your battery.

If the battery does not recover after recharging, contact your dealer.

### NOTICE

Do not jump-start, as this can damage your motorcycle's electrical system and battery. Bump starting is not recommended.
