Tachometer

NOTICE

Do not operate the engine in the tachometer red zone. Excessive engine speed can adversely affect engine life.

Tachometer red zone

(excessive engine rpm range)

MODE button

RESET button

Changing the Speed and Mileage Unit

Press and hold **MODE** button to change the speed and mileage units ("mph" and "mile" / "km/h" and "km") for the speedometer, odometer and tripmeter at normal display.

Press **MODE** button to select either "mph" and "mile" or "km/h" and "km", then press and hold **MODE** button to set.
