A manually operated tire pump should be used rather than the high pressure system found in service stations. This will minimize the possibility of tire damage from overinflation. If you use a high pressure system at a service station, add air in small amounts and check the pressure increase frequently to prevent possible tire damage from overinflation

## **AWARNING**

Operating this Honda MUV with improper tires. or with uneven tire pressure may cause loss of control, and you could be seriously injured or killed.

- Always use the size and type tires specified in this owner's manual for this vehicle.
- · Always maintain proper tire pressure as described in this owner's manual

## Inspection

Refer to Safety Precautions on page 79.

Whenever you check the tire pressures, you should also look for:

- Bumps or bulges in the side of the tire or the tread. Replace any tire that has a bump or bulge.
- Cuts, slits, or cracks in the tires. Replace the tire if you can see fabric or cord
- Nails or other foreign objects embedded in the side of the tire or tread.
- Excessive tread wear.
