

Starting the Engine *(Continued)*

To Start the Engine with Electric Starter

- 5 Press the start button with the throttle completely closed. Release the start button as soon as the engine starts.

To Start the Engine with Kickstarter

- 5 With the throttle closed, operate the kickstarter with a rapid and continuous motion.
 - ▶ Allowing the kickstarter to snap back freely against the pedal stop can damage the engine case.
 - ▶ Fold the kickstarter pedal after the kickstarter lever is returned to the stop.
