

Driver Controls

Steering Wheel Adjustment Lever

Your Honda SXS is equipped with a height-adjustable steering wheel. Adjust the steering wheel position so that you can comfortably grip the steering wheel in an appropriate driving posture.

3 WARNING

Adjusting the steering wheel position while driving may cause you to lose control of the vehicle and be seriously injured in a crash. Adjust the steering wheel only when the vehicle is stopped.

NOTICE

The steering wheel position damper unit contains high pressure nitrogen gas. Do not attempt to disassemble, service, or improperly dispose of the damper. See your dealer.
