

Suspension

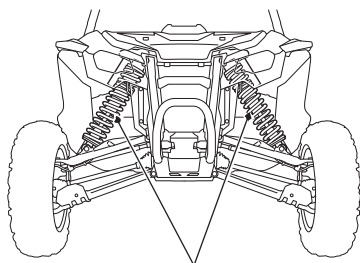

Suspension Components Inspection

Refer to *Safety Precautions* on page 115.

1. Jack up and support your Honda SXS (page 133).
2. Visually inspect the front and rear suspension arms, bushings, ball joints and shock mount bearings for any damage.
3. Visually inspect the front and rear shock absorbers for any oil seal leaks, dents in main body or shock reservoir, shock body wear or other damages.

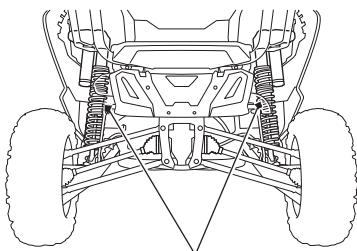

If leaks or damage is found, take your vehicle to your dealer.
