

# Side Nets

---

## Roll Up The Side Nets

The side nets can be rolled up to make cleaning and maintaining your Honda SXS a little easier.

### Front Side Nets Roll Up

1. Release the side net buckle and side net D-rings.
2. Unhook the side net snap hooks and slide the D-rings out of the stays.
3. Roll up the side net tightly, folding in the buckle and snap hooks on the way.
4. Hook the two upper side net hooks to the top edge of the side net.

### Front Side Nets Roll Down

1. Unhook the upper side net hooks.
2. Fasten the side net buckle and hook the side net snap hooks. Tighten the belt of side net D-ring.

Always return the side nets to their normal positions, properly fastened, and tightened before driving.
