

# Is Your ATV Ready to Ride?

Before each ride, it's important to inspect your ATV and make sure any problem you find is corrected. A pre-ride inspection is a must, not only for safety, but because having a breakdown, or even a flat tire, can be a major inconvenience.

If your ATV has overturned or been involved in a collision, do not ride the vehicle until it has been inspected by your dealer. There may be damage or other problems you cannot see.

## 3 WARNING

Improperly maintaining this ATV or failing to correct a problem before riding can cause a crash in which you can be seriously hurt or killed.

Always perform a pre-ride inspection before every ride and correct any problems.

### Pre-ride Inspection

Check the following items before you get on the ATV:

- |                         |   |
|-------------------------|---|
| <i>Engine Oil</i>       | Check the level and add oil if needed ( <a href="#">page 91</a> ).<br>Check for leaks.              |
| <i>Transmission Oil</i> | Check the level and add oil if needed ( <a href="#">page 97</a> ).<br>Check for leaks.              |
| <i>Radiator Coolant</i> | Check the coolant level and add coolant if needed ( <a href="#">page 101</a> ).<br>Check for leaks. |
