

# Load Limits & Guidelines

---

## Load Limits

Following is the load limit for your ATV:

There is a limit to how much weight can be carried on your ATV.

The following load limit applies to standard equipment only. Modifying your ATV, using non-standard equipment, or riding on terrain that is not flat and smooth could further reduce this limit.

**maximum weight capacity      187 lb (85 kg)**  
(includes the weight of the rider, and all accessories.)

The weight of added accessories will reduce the maximum cargo weight you can carry.

## Loading Guidelines

As discussed on [page 38](#), we recommend that you do not carry any cargo on this ATV. However, if you decide to carry cargo, ride at reduced speeds and follow these common-sense guidelines.

- Check that the tires are properly inflated.
- Never ride with a passenger. The ATV is not designed to carry a passenger.
- Balance cargo weight evenly on both sides.
- Never exceed the maximum weight limit.
