

# Load Limits & Guidelines

---

## Load Limits

Following is the load limit for your ATV:

There is a limit to how much weight can be carried on your ATV.

The following load limit applies to standard equipment only. Modifying your ATV, using non-standard equipment, or riding on terrain that is not flat and smooth could further reduce this limit.

**maximum weight capacity      187 lb (85 kg)**  
(includes the weight of the rider, and all accessories.)

The weight of added accessories will reduce the maximum cargo weight you can carry.

## Loading Guidelines

As discussed on page 38, we recommend that you do not carry any cargo on this ATV. However, if you decide to carry cargo, ride at reduced speeds and follow these common-sense guidelines.

- Check that the tires are properly inflated.
- Never ride with a passenger. The ATV is not designed to carry a passenger.
- Balance cargo weight evenly on both sides.
- Never exceed the maximum weight limit.
