### Front Brake Pad Replacement

Clean the brake disc with a high quality degreasing agent if they are contaminated with oil or grease. Replace the pads if they are contaminated.

Remove the brake caliper mounting bolts and caliper. Remove the spring pin from the pads.

Push the pistons **all** the way in to allow installation of new brake pads. Check the brake fluid level in the reservoir as this operation causes the level to rise.

Remove the spring pin from the pads.

Clean the brake caliper inside especially around the caliper pistons.
